Individual results (31 students)

Marks pull automatically from the five milestone tabs.

ID	Student name	M1 Detect	M2 Optimize	M3 Decide and Act	M4 Monitor and Connect	M5 Complete System	Total (/100)	Grade	M5 sign-off (M3 gate)
S01	Aatif F	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate
S02	Akshaya M	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate
S03	Archana C	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate
S04	Bhuvanashree K R	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate

S28	Tejaswi K	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate
S29	Theeran P	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate
S30	Udhayan K	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate
S31	Viswes Vijayaragavan Sivakumar	0	0	0	0	0	0	Not yet	BLOCKED: M3 below gate

What each student must personally do and show

Milestone	Task	What this student must show (individual proof)	Milestone name	Max marks
M1	Camera and repo	I capture a frame on the device and make my own commit with the spec sheet and first frame	M1 Detect	2
M1	OpenCV pipeline	I run the live overlay (boxes + count) on the device myself	M1 Detect	4
M1	Baseline speed	I measure FPS, latency, CPU/GPU load, temperature and show my own numbers	M1 Detect	3
M1	Dataset v1	I label images with tight, correct boxes. I show my own labelled images and the data card	M1 Detect	4
M1	Correct split	I explain and show the 70/20/10 split with no leakage	M1 Detect	2
M1	Train and run detector	I show mAP@0.5, precision, recall, confusion matrix vs the target, and explain 10 wrong detections	M1 Detect	5
M2	Export to ONNX	I run the ONNX export myself and show my commit	M2 Optimize	3
M2	Convert and run live	I convert to TFLite INT8 or TensorRT and run it live on the device	M2 Optimize	4
M2	Accuracy check	I show mAP before vs after on the same test set	M2 Optimize	4
M2	Fair benchmark	I run 20 warm-up and 100+ timed runs at batch 1. I show median and p95 latency, FPS and model size	M2 Optimize	4
M2	CPU vs accelerator + stack	I show the CPU vs accelerator table and draw the software stack	M2 Optimize	2
M2	Own target and trade-off	I show the accuracy and speed target I wrote before training, my result, and explain the trade-off in simple words	M2 Optimize	3
M3	Decision rule sheet	I write the input, threshold, action and safe state if the camera fails	M3 Decide and Act	3
M3	Two-stream pipeline	I run two streams at once and show FPS per stream	M3 Decide and Act	4
M3	Debounce	I show one bad frame does not trigger and N frames in a row do	M3 Decide and Act	4
M3	Actuator fires	I make the relay, LED or conveyor-stop signal work live	M3 Decide and Act	3
M3	Docker	I build and start the container from a cold boot and trigger the actuator	M3 Decide and Act	4
M3	End-to-end latency	I measure frame-to-actuator latency over 20+ events	M3 Decide and Act	2
M4	Sensor data	I wire/read the MPU6050 and show labelled normal and fault CSV runs (3 each)	M4 Monitor and Connect	3
M4	Anomaly model	I train on normal data only and show the live alert when I inject the fault	M4 Monitor and Connect	4
M4	False alarms	I count false alarms over 5 normal runs and explain my threshold	M4 Monitor and Connect	2
M4	Secure MQTT	I show the broker refuses no-password and works with password + TLS	M4 Monitor and Connect	3
M4	Topics	I publish detection and motor score and show them on a subscriber	M4 Monitor and Connect	2
M4	PLC link	I show the PLC tag change when an object is detected	M4 Monitor and Connect	2
M4	Threat model	I show one threat per level and 2 mitigations applied	M4 Monitor and Connect	1
M4	Reliability	I show the drift report, OTA v1 to v2 with rollback, and auto-restart after a forced crash	M4 Monitor and Connect	3
M5	Inspection rig	I show a fixed, repeatable camera and light rig and an image set with every defect type	M5 Complete System + Dashboard	2
M5	Pass/fail station	I test 20 parts (10 good, 10 defective) and show the confusion matrix and false-pass rate	M5 Complete System + Dashboard	4
M5	Full chain on the device	I run camera to dashboard together for 10 minutes and fix what breaks	M5 Complete System + Dashboard	4
M5	Live dashboard	I show live detections, PASS/FAIL view, camera view, 3 KPIs and motor alert	M5 Complete System + Dashboard	4
M5	Product readiness	I show auto-start after power-cycle, offline run and logs	M5 Complete System + Dashboard	2
M5	Headline metric	I measure one headline number (for example correct results out of 50, or false-pass rate) and show it live	M5 Complete System + Dashboard	2
M5	Documents	I show my commits to the README, datasheet, architecture diagram or demo video	M5 Complete System + Dashboard	1
M5	Live demo and questions	I run one normal run and one injected fault, and answer the coach's questions	M5 Complete System + Dashboard	1
			Total	**100**

Goal: I can get the device working and train a detector that finds my two objects. Enter each student's marks in the yellow cells (0 up to Max).
